*****For Sale*****
****AOR2800 Scanner****
Wife says I have to many toys, So, I must say
goodbye to some of it for cash. (I guess she
wants to spend some of our money too!) :)

This scanner was purchaced from Ace Communications

1 year ago, for \$449.00 plus shipping. It is in
mint condition, and has everything it came with,
except the box. (Wasn't that great of a box anyway!)

Selling price: \$325.00, I pay shipping.

Terms: Money Order or Cashiers check ships same day
Personal check must clear first. No COD.

Trades: May be interested in NEWER computer peripherals
or components (NO 8088, 286, or 386SX16 junk please!)

All mode TNC, Misc. Ham gear (Keyers, paddles, Antennas
etc.) These may be partial trades with cash, or full.

Features:

AM, NFM, WFM, SSB w/BFO
Coverage; 500KHz-600MHz 800MHz-1300MHz
Sensitivity: .35uV Narrow FM
 1.0uV Wide FM
 1.0uV AM

Step Increments; 5-995KHz

1000 Memory Channels
1000 Search Channels

This unit works flawlessly, and is guaranteed against DOA
Does HF Ham bands and SW Great! (If you are wondering why
the cut-out between 600MHz and 800MHz, it is to prevent
front end overload from strong TV stations, which is the
only thing you mis by not having those frequencies)

Comes with manual, Antenna, Power supply and a nifty acrylic
desk stand, and a cigarette lighter plug.

If interested, send E-Mail to ronh@pacifier.rain.com

I recently acquired a Motorola Micor Radio Model #T71RTN1490A. It is a VHF-low radio but it is missing the crystal elements to pu the crystals in. I am searching high and low for the elements. If anyone knows where I could track down some. Please send mail. DE ANAYLOR@DELPHI.COM

To: ham-equip@ucsd.edu

I just acquired a Hallicrafters SB3 broadcast/SW receiver, and it is rather cute and fun to play with. The LO seems to be quite a bit out, however. Does anyone have a schematic to get me pointed in the right direction to re-align this box? Would be much appreciated!

Intl. Radio and Computer has all the Fox Tango stuff still available.
The address and phone # slips my mind, but they are in Port Lucie Fla. so
telephone information should give you the phone number.

I bought the WARC band kit for my 101E and installed it. It worked
well. Good stuff.

Not quite. I purchased the FoxTango Newsletters. They are definitely
out of the 1974 newsletters. They claim that the 1975 is still
available but they still haven't sent it to me.

Could someone post or e-mail a list of the differences between the FT-757GX
and FT-757GX-II? Thanx. 73 Dave WB0GAZ dgf@netcom.com

IMHO buy one RS220 and one RS440 and tape
them back to back. At least you will be able
to understand the manual.....

Subject: Yaesu FIF-232 interface info
To: ham-equip@ucsd.edu

Hello All,

Can anyone tell me if the Yaesu FIF-232 interface uses or does anything with the A.G.C. line on the C.A.T. output from their rigs ?

IE, does it do any kind of A/D conversion on the A.G.C. line that will allow you to send the data up the RS232 interface to a computer.

Or does it just pretend it's not there.

Regards, Sean.

Subject: YAESU FT-2200 PROBLEM
To: ham-equip@ucsd.edu

To Yaesu FT-2200 owners,

I am having great difficulty in utilizing the auto-dial feature that is listed on page 35 of the owners manual.

I have no problem entering my telephone number (7 digits) or my speed dial number (3 digits).

The problem comes when I replay the stored digits. There is always an EXTRA digit. I am therefore unable to excess our auto-patch using the programmed auto-dail feature.

I and several other hams have entered and reentered numbers time and time again with the same results. Regardless of the number of digits entered, on replay there is always that extra digit.

Am I doing something wrong or is this a bug in the auto-dail feature of the FT-2200? Any help and/or suggestions will be appreciated.

Have a nice day. :-)

73, Murrie (KD4TKB)
